

Using the SSIS SEL Intervention Program to Teach and Evaluate Students Self-Management and Relationship Skills

Elliott, S

Arizona State University

Davies, M

Griffith University

This presentation will focus on the use of the SSIS SEL edition, an assessment and intervention program aligned with the ACARA Personal and Social Capabilities curriculum, to (1) identify SEL self-management and relationship skills that qualify as needing improvement, (2) teach the needed skills using a 6-step, S.A.F.E. intervention, and (3) evaluate the outcomes of the intervention. Case examples with data from an Australian primary school will be used to illustrate effective practices for teachers and typical outcomes for students with additional needs.
